Compliance Cockpit

Similar to pilots, compliance officers have to have a clear overview and be aware of risks in the entities, countries or regions they are responsible for to enable them to steer the company into the right direction. But how can that be achieved?

Step 1

Collect

We collect data from various sources in your global organization

Step 2

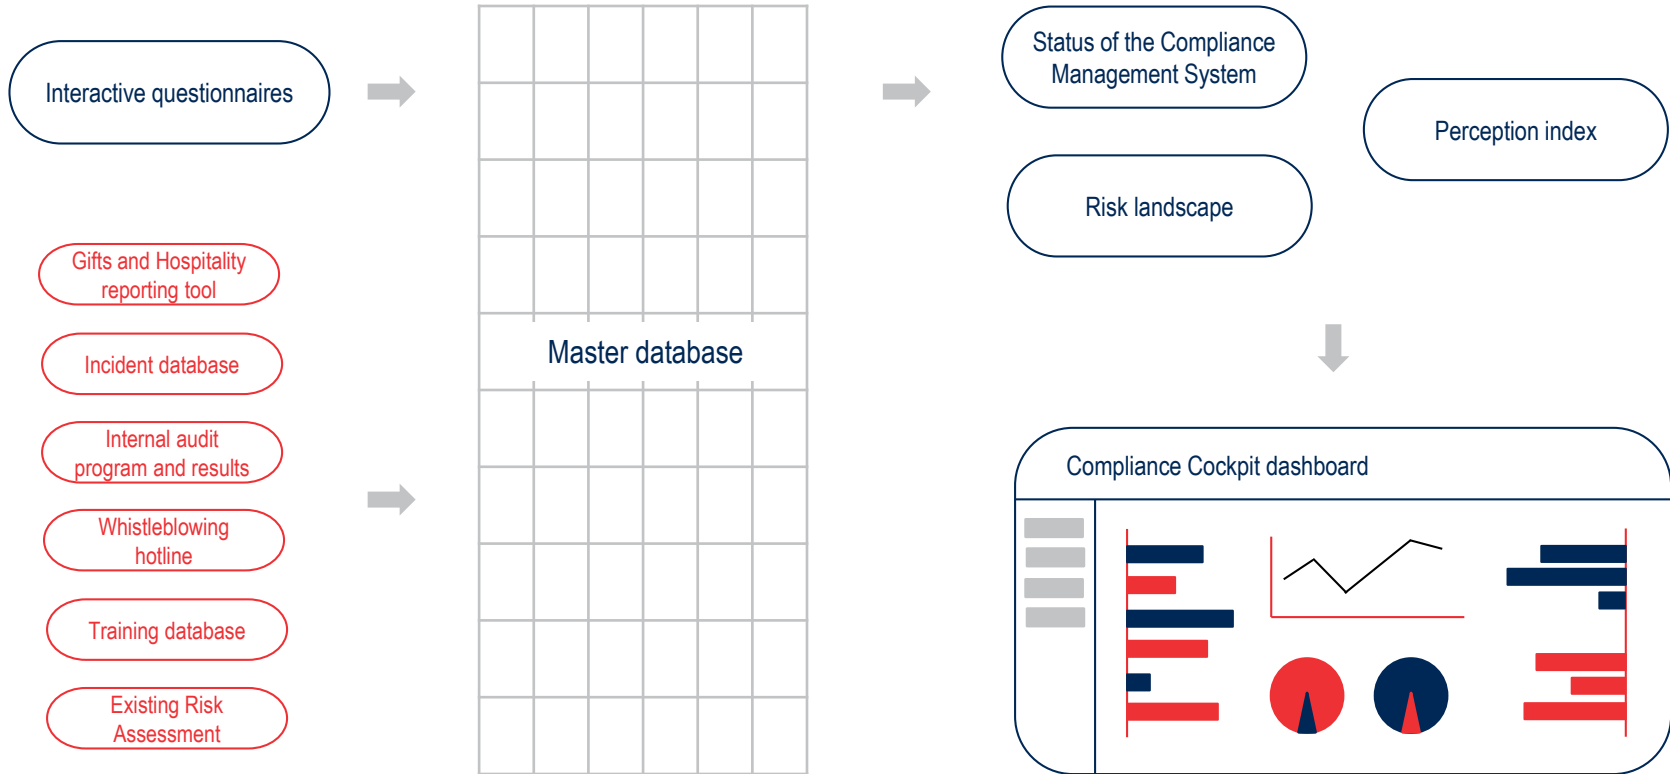

Analyze

Via predefined algorithms, we analyze and rate the available data

Step 3

Visualize

We visualize the data in an interactive dashboard

Benefit 1

Save money

Automating the collection and analysis of data can save you a significant amount of money for extensive onsite checks

Benefit 2

Increase efficiency

Once you have cost-efficiently analyzed the status of your compliance management system and the risk landscape you can allocate your resources in a more efficient and impactful way

Benefit 3

Lower risk exposure

Implementing remedial measures based on the results from the Compliance Cockpit will significantly lower the risk exposure of your company and its management
